

JOEL RUTTER

Junior Full Stack Software Developer

GitHub: <https://github.com/JoelMichaelRutter>

Website: <https://bit.ly/3LK91Zq>

A hard-working, enthusiastic individual seeking an exciting Junior Software Developer opportunity. With experience in Frontend and Backend development, I'm skilled across HTML5, CSS3, Python and JavaScript. Dedicated to enhancing my knowledge and taking on complex challenges whilst working as part of an agile team, and independently as a motivated self-starter who can work well using initiative.

Achieved: B
BTEC Music Performance
Achieved: Merit

GCSE

Sir Thomas Boteler High School
2004 - 2009
Achieved: 10 GCSEs graded B - C
including English and Maths

TECHNICAL SKILL SET

TECHNOLOGIES

- HTML5
- CSS3
- JavaScript
- Python
- AWS

DATABASES

- PostgreSQL

FRAMEWORKS/ LIBRARIES

- Bootstrap 5
- jQuery
- Django

VERSION CONTROL

- GitHub
- Git

TESTING

- UnitTest
- Django Testcase

PROFESSIONAL EXPERIENCE

FULL STACK SOFTWARE DEVELOPMENT DIPLOMA (E-COMMERCE)

Code Institute | April 2021 - April 2022

During the course, I delivered five solo portfolio projects covering a variety of themes and technologies:

- **Project 1 (Static Frontend):**
 - I developed a fully responsive static website for a fictional bar & brewery using HTML5 & CSS3. This is deployed on GitHub Pages at the following link: <https://bit.ly/3j7CTCL>
- **Project 2 (Interactive Frontend):**
 - I developed a fully responsive interactive zombie-apocalypse themed personality quiz using HTML5, CSS3 (Flexbox) and JavaScript. This project is deployed on GitHub Pages at the following link: <https://bit.ly/3ubMiiU>
- **Project 3 (Data Centric Backend):**
 - I developed a command line application to record learning and development data for members of staff using Python and the GSpread API. This application is deployed to Heroku at the following link: <https://bit.ly/3Kil9QY>
- **Project 4 (Full Stack):**
 - I developed a full stack CRUD application for users within a complaints team to manage allocations of customer complaints in a responsive and user-friendly web interface using HTML5, Bootstrap 5, CSS3, jQuery, Python, Django & its associated libraries and PostgreSQL. The application is deployed on Heroku at the following link: <https://bit.ly/3DJaDzK>
- **Project 5 (E-commerce):**
 - I developed a full stack business to consumer e-commerce application for a fictional online vinyl record shop using HTML5, Bootstrap, CSS3, JavaScript, jQuery, Python, Django and its associated libraries - Stripe and PostgreSQL. The project is deployed to Heroku at the following link: <https://bit.ly/3Kjfyd9>

LEARNING AND DEVELOPMENT EXECUTIVE

Currys PLC - Financial Services Group (formerly Dixons Carphone) | Jan 2018 - Present

- Delivering the training and development strategy for our front line and management functions.
- Designing, delivering, and auditing bespoke training material, briefings and staff guidance documentation across several business areas in line with the induction and business framework.
- Maintaining strong relationships with both internal and external stakeholders
- Adapt and improve all employee training experiences to ensure positive customer outcomes.
- Monitoring all material to ensure compliance requirements are met and following a strict version control framework.
- Managing and assessing trainees and new employees, monitoring their progress, and signing them off as fully trained employees.
- Managing comprehensive training databases and feedback records across the business
- Maintaining staff competence files in line with the business's Training and Competency Scheme.
- Undertaking audit readiness actions and audit gap analysis to drive continuous improvement and minimise risk to the business.

Further experience and references available upon request.
